

Model 740ACCU

without photo control

BDS's AC Control Unit without photo control. The Control Unit supplies power to the LED lights in the windsock frame and optional top beacon/obstruction light. The ACCU (Alternating Current Control Unit) accepts an input voltage of 90 – 264 volts AC and its power supply has as output of 12 volts DC.

The Control Unit is housed in a weather-proof enclosure and therefore can be installed outdoors.
