

Model WF36

Non-Lighted Windsack Frames

BDS's 36" Non-Lighted Windsack Frame.

The frame is a mechanical assembly with an outer ring for mounting the windsack. Delrin type bearing hubs permit the frame to rotate 360 degrees as wind direction changes.

A 1" NPT connection is on the bottom of the frame assembly for connection of support piping supplied "by others".

Specifications

- FRAME assembly – 36" diameter.
- Heavy duty construction – 2 inch round PVC tubing with Delrin type bearing ends hubs, and 304 welded stainless steel. Top rain cap.
- Windsack mounting ring offset from main tubing assembly by approximately 11 inches (front to back – depth).
- A 1" NPT connection is on the bottom of frame assembly for connection to 1" or larger support piping supplied "by others".
- Weight: 20 pounds (9.07kg).
- Specifications subject to change without notice.
